

Assignment#3 Term Project (Part I)

Due May 21, 11:30PM

In this assignment, each team will only need to submit their results through the team captain's account. Please be sure to include the names of all team members.

The deliverable is a PDF document listing three InfoVis papers that were published after 2014. Please see the links below:

<http://www.cad.zju.edu.cn/home/vagblog/vispapers/infovis2016.html>

In your writeup, for each paper

- (1) write a paragraph explaining the paper (problem statement, technique, results). Be sure to paraphrase instead of copying/pasting the abstract or other parts of the papers.
- (2) write a paragraph explaining how this paper may relate to your term project (a better technique, a novel application of the same technique, etc). Furthermore, list the challenges if you were to work on this paper.

In addition, list at least seven other papers that you have read but decided not to be use your term project. In other words, you need to read carefully at least ten papers before selecting three.
