CS458/519 Information Visualization: Term Project

Due June 14, 2017

In the term project, you will implement a paper that is agreed upon between your team and the class instructor. The paper must be on a topic that is in the area of information visualization. As part of the project, you will perform the following tasks:

On midnight June 14, 2017, turn in the final report. If your project involves implementation, please submit, source code and anything necessary to compile and run your program.

The final report should be in the format given in the homework assignment:

Basically, your term report is like a paper, and it should be well-written with necessary components: introduction, related work, description of the algorithm that you use, results, future work, and references.
